## THE POWER OF 60!

Guinness World Records is celebrating 60 years of records!

Sixty is a pretty impressive number. You might have parents, grandparents, or aunts and uncles in their sixties. Think about it: They have been alive for 60 years—or more!

Look around you. Are there 60 different things you can see? (pencils, pieces of paper, books, pens, sticky notes, stickers, chair legs, shoes, etc.)

Answer the questions below. If you have not learned how to solve one or more of these, skip the ones that are new. Or take a guess!

- a. What part of 60 are you? 60 ÷ \_\_\_\_\_ = \_\_\_\_
- **b.** How many times does 3 go into 60?
- c. What is 60 x 60?
- d. How many seconds are in a minute?\_\_\_\_\_\_
- e. How many minutes are in an hour?\_\_\_\_\_

BONUS: How many sides does an icosidodecahedron have?\_\_\_\_\_

(All the sides are equal. Take a guess!)

Here are some of the Guinness World Records records that were set in the last 60 years. Decide which is your favorite!

Longest dog ears (11.5 in/29.2 cm)

Neil Bryant did the most push-ups in 60 seconds (50!) wearing a 60-pound pack.

Largest ice-cream cone (9 ft 2.63 in/2.81 m)

Which record is your favorite? Explain.\_\_\_\_\_
